UK MARKS BUILDING'S 'TOPPING OUT'

Beverly Marksbury signed the beam as her husband, Davis Marksbury, center, and University of Kentucky President Lee T. Todd Jr. watched during Monday's topping-out ceremony for the Davis Marksbury Building, part of the UK College of Engineering's "Digital Village," in the 300 block of Rose Street. The topping-out ceremony marked the placement of the final steel I-beam in the building's structural skeleton. Attendees were invited to sign the I-beam before it was lifted into position and riveted to the structure. Davis Marksbury, a UK engineering alumnus, was the lead donor for the three-story, 45,000-square-foot building.
