

Need and Merit-Based Aid at UK and UofL by Student Type and Family Income

Full-Time, In-State, Undergraduates who Received Grants or Scholarships in 2007-08

Highlights

- * Grants and scholarships covered the full cost of tuition, fees and books for most students in the lowest income categories.
- * Even students in the highest income categories received significant support through KEES and institutional aid.
- * Eighty-five percent of undergraduate students at research universities received grants in 2007-08.
- * Grants in excess of tuition were used to pay for room and board, which averaged an additional \$7,160 (IPEDS).

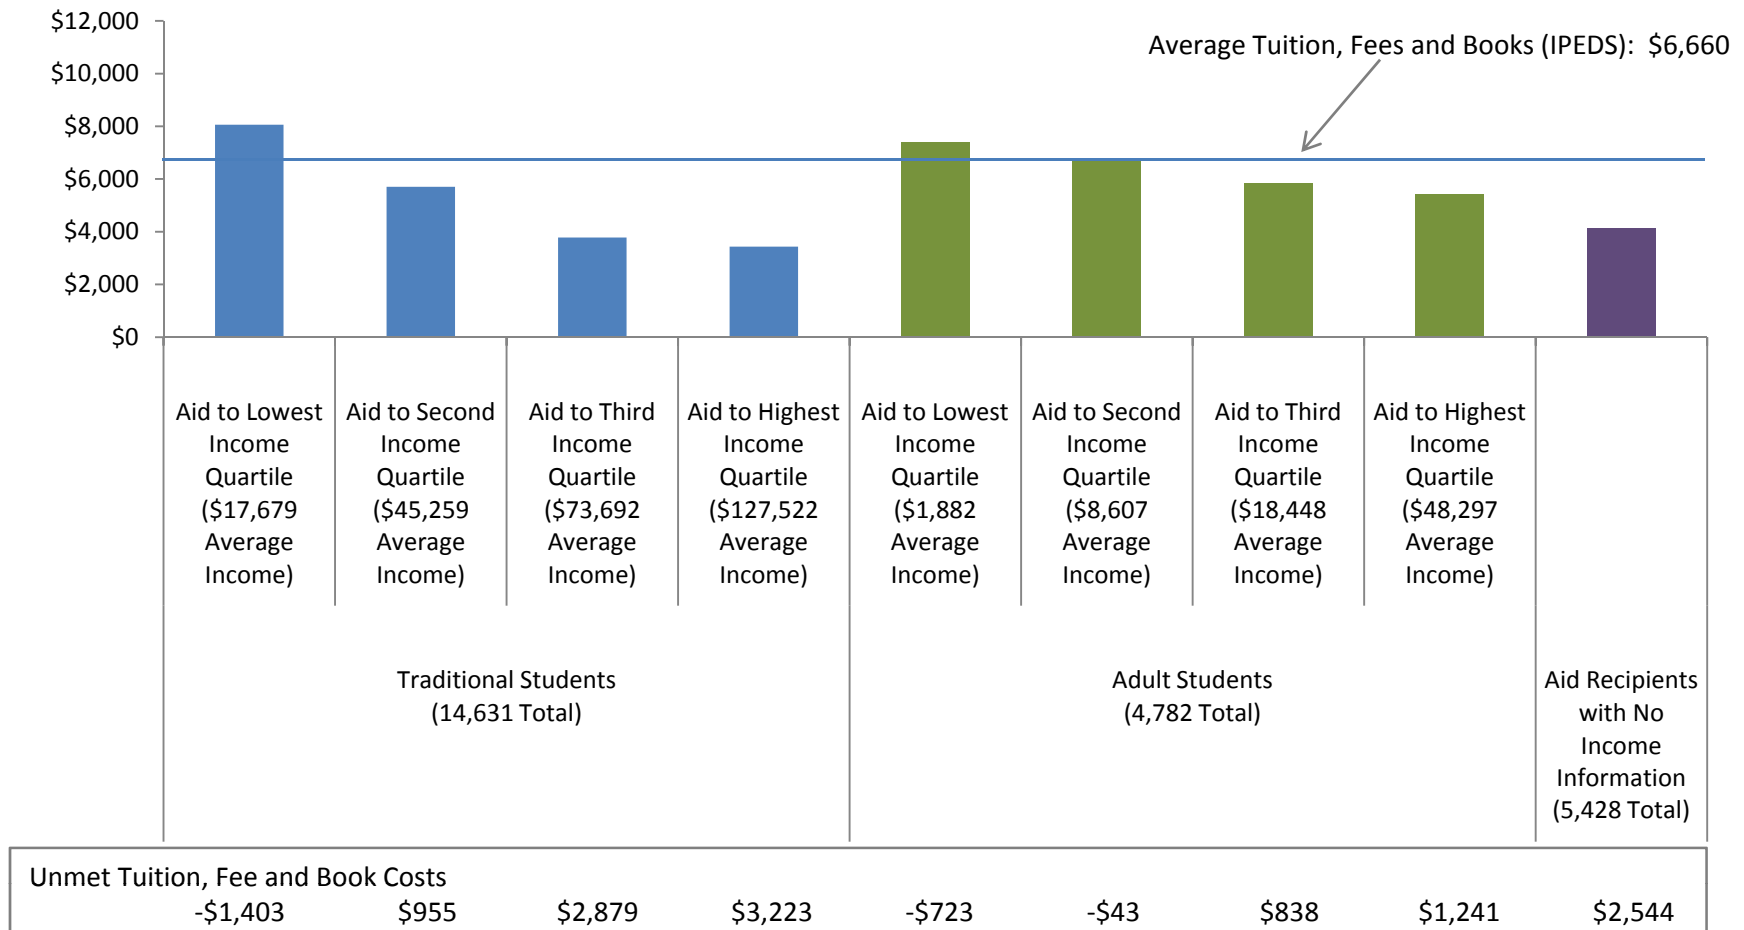

Notes: Aid includes all need and merit-based grants and scholarships from federal, state, institutional and other sources. Income quartiles rank all students in the sector within their dependency category by family income, dividing them into four equal-sized groups based on their income rank. Traditional students were under 25 years old and were claimed as dependents on their parents' taxes, while adult students filed independently. Students without income information did not file the federal financial aid application.

Need and Merit-Based Aid at Comprehensive Universities by Student Type and Family Income

Full-Time, In-State, Undergraduates who Received Grants or Scholarships in 2007-08

Highlights

- * Grants and scholarships covered the full cost of tuition, fees and books for most students in the lowest income categories.
- * Even students in the highest income categories received significant support through KEES and institutional aid.
- * Eighty-three percent of undergraduate students at comprehensive universities received grants in 2007-08.
- * Grants in excess of tuition were used to pay for room and board, which averaged an additional \$5,750 (IPEDS).

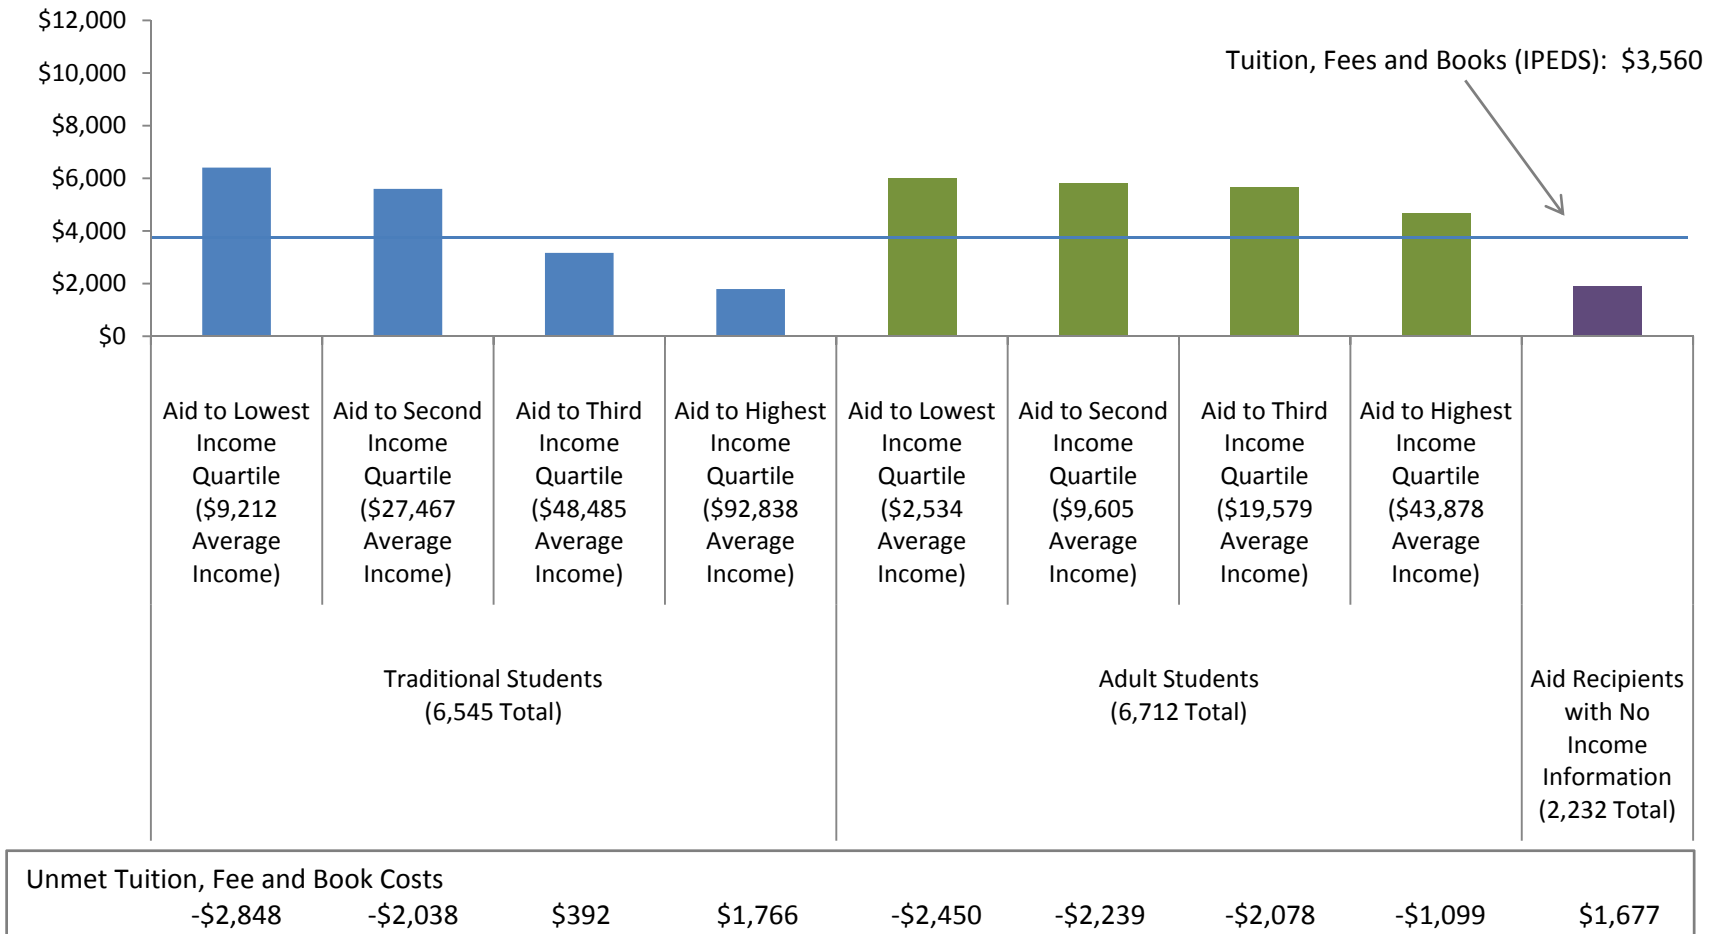

Notes: Aid includes all need and merit-based grants and scholarships from federal, state, institutional and other sources. Income quartiles rank all students in the sector within their dependency category by family income, dividing them into four equal-sized groups based on their income rank. Traditional students were under 25 years old and were claimed as dependents on their parents' taxes, while adult students filed independently. Students without income information did not file the federal financial aid application.

Need and Merit-Based Aid at KCTCS by Student Type and Family Income

Full-Time, In-State, Undergraduates who Received Grants or Scholarships in 2007-08

Highlights

- * Grants and scholarships covered the full cost of tuition, fees and books for most students in the lowest income categories.
- * Even students in the highest income categories received significant support through KEES and institutional aid.
- * Seventy-nine percent of undergraduate students at KCTCS received grants in 2007-08.
- * Grants in excess of tuition were used to pay for off-campus rent, utilities and food, which KCTCS estimated at an additional \$6,950 (IPEDS).

Notes: Aid includes all need and merit-based grants and scholarships from federal, state, institutional and other sources. Income quartiles rank all students in the sector within their dependency category by family income, dividing them into four equal-sized groups based on their income rank. Traditional students were under 25 years old and were claimed as dependents on their parents' taxes, while adult students filed independently. Students without income information did not file the federal financial aid application.
