STEM SUMMER SPARK

Prepare for a successful first year of college by strengthening math skills and engaging with faculty, staff, and STEM students.

STEM Summer Spark

is a five-week summer bridge program that supports future NKU STEM students in their college mathematics preparation and career explorations.

You'll find that many of your introductory STEM courses rely on mathematical skills, and many STEM majors require the completion of calculus. The STEM Summer Spark program is designed to help accelerate preparation for your STEM classes.

PROGRAM FEATURES

During this program, you will spend five weeks strengthening your mathematics skills, participating in mini research experiences, and exploring career opportunities in STEM. Benefits include:

- Increasing mathematics course placement (essentially replace a math course, up to a \$1000 value).
- Earning credit for SCI 101: Introduction to STEM Careers
- Receiving personal support from NKU faculty, students, and staff.
- Providing access to campus resources and services to help transition into your first year at NKU.

The **2023 STEM Summer Spark** bridge program is scheduled for June 20 – July 21. Program cost is \$295.

STEM PROGRAMS

- Biological Sciences // Environmental Science // Neuroscience
- Chemistry
- Applied Software Engineering // Computer Science // Computer Information Technology // Cybersecurity // Data Science
- Mathematics // Statistics
- Physics // Engineering Physics // Pre-Engineering // Geology
- Electrical & Electronic Engineering Technology // Mechanical & Manufacturing Engineering Technology // Mechatronics Engineering Technology
